

STORAGE RACKS SYSTEM

SLAB RACK - 3 METERS LONG

ASR01

The Aardwolf Slab Rack consists of a pair of galvanized steel rails 3 meters long, together with galvanized square steel tube posts. The square post can be positioned anywhere along with the rack. All posts are manufactured from square tube steel with a minimum yield strength of 345Mpa, ensuring safety for the vertical storage of slab bundles.

- The maximum number of marble or granite slabs that can be safely stored per bay at a 4° lean depends on the slab thickness and dimensions.

Galvanized steel rail	2979 x 164 x 165 mm
Rack height	165 mm
Square hole	52 x 52 mm
Increment	57 mm
Square tube post	50 x 50 mm
Posts wall thickness	5 mm
Square rubber cap	52 x 52 mm
Timber battens per rail	50 x 25 mm
Net weight	78 kg / PCS

- **Height Posts**
 - 800 mm
 - 1200 mm
 - 1400 mm
 - 1600 mm
 - 1800 mm

BUNDLE RACK - 3 METERS LONG

ABR10

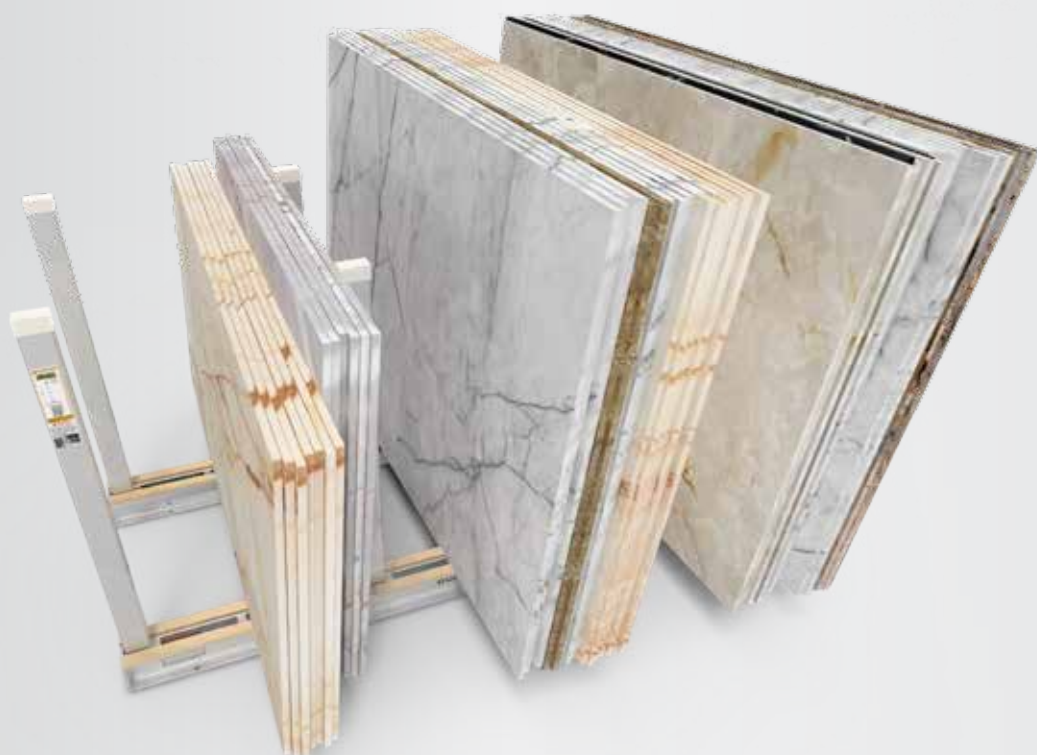

The Aardwolf Bundle Rack consists of a pair of galvanized steel rails 3m long, together with rectangular galvanized steel tube posts (these posts and steel post bases are to be sold separately). The rectangular post can be positioned anywhere along with the rack. All posts are manufactured from rectangular tube steel with a minimum yield strength of 345Mpa, with 5mm wall thickness, ensuring safety for the vertical storage of slab bundles.

- The bases and seven holes are made of folded steel and making the rack is so lightweight.
- The maximum number of marble or granite slabs that can be safely stored per bay at a 4° lean depends on the slab thickness and dimensions.

Galvanized steel rail	3013 x 167 x 140 mm
Rack height	160 mm
Rectangular hole	101 x 51 mm
Increment	111 mm
Rectangular tube post	100 x 50 mm
Posts wall thickness	5 mm
Rectangular rubber cap	100 x 50 mm
Timber battens per rail	50 x 20 mm
Net weight	57 kg / PCS

- Height Posts
1200 mm
1400 mm
1600 mm

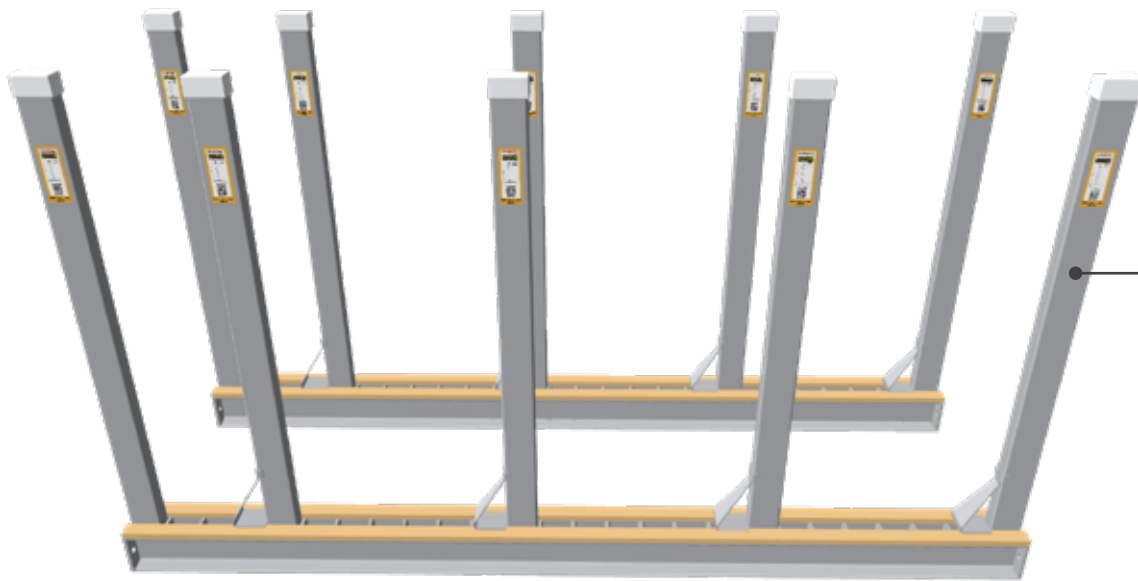

BUNDLE RACK - 3 METERS LONG

ABR01

The Aardwolf Bundle Rack consists of a pair of galvanized steel rails 3m long, together with rectangular galvanized steel tube posts (these posts and steel post bases are to be sold separately). The rectangular post can be positioned anywhere along with the rack. All posts are manufactured from rectangular tube steel with a minimum yield strength of 345Mpa, with 5mm wall thickness, ensuring safety for the vertical storage of slab bundles.

- ◆ The maximum number of marble or granite slabs that can be safely stored per bay at a 4° lean depends on the slab thickness and dimensions.

Galvanized steel rail	2925 x 164 x 165 mm
Rack height	165 mm
Rectangular hole	101.5 x 52 mm
Increment	111.5 mm
Rectangular tube post	100 x 50 mm
Posts wall thickness	5 mm
Rectangular rubber cap	100 x 50 mm
Timber battens per rail	50 x 25 mm
Net weight	77.7 kg / PCS

- ◆ Height Posts
1200 mm
1400 mm
1600 mm

The Workshop storage racks are ideal for distributors and shops that use a variety of slab sizes. As inventory is used, posts can be adjusted horizontally, thus eliminating unused portions of the rails, making space available for replacement slabs and bundles. Please review our storage rack selection and specifications to select the correct rack components.

- ❖ The rack heights are aligned for glass/stone dolly used for transporting slab material.
- ❖ Galvanized square tube posts with rubber post caps to prevent scratches to polished surfaces
- ❖ Rubber-topped rails protect the slab edges and finish on marble and granite.
- ❖ The maximum number of marble or granite slabs that can be safely stored per bay at a 4° lean depends on the slab thickness and dimensions.

Rail length	2400 mm
Square tube post	50 mm
Net weight	78 kg
Packaging Dimension	2400 x 120 x 123 mm

***Sold in a pair

SLAB RACK CALCULATOR

This phone app allows users to calculate the number of slabs that can be safely stored per bay depending on the slab dimensions. The users simply need to enter the slab dimensions either in metric or imperial measurements. The app supports the languages English, German, French and Vietnamese.

Ensure your slabs are safely stored by using the AARDWOLF Slab Rack Storage Calculator.

Get it on
Google play

Download on the
App Store

Free download on Apple Store and Google Play. AARDWOLF - Slab Rack Storage Calculator enables you to determine the height and type of post best suited for your storage requirements.

Accessible anywhere and at all times AARDWOLF Slab Rack Storage Calculator allows you to calculate the number of slabs that can be safely stored per bay with just a few finger motions.

- User friendly interface
- Easy and quick to determine the number of slab per bay
- Available in English, French, German and Vietnamese

SLAB RACK FABRICATOR

This app allows factory owners to design and select the appropriate storage rack for their needs. By using this app factory owners can see exactly how many slabs that can be stored in the racks depending on the slab dimension. This app is suitable for calculating storage capacity for the Aardwolf Slabs Racks, Bundle Racks and Work Shop Racks.

DESIGN YOUR OWN SLAB.

WHAT DO YOU WANT TO STORE: Slab Glass Steel

1. Choose your rack

DESCRIPTION	SLAB RACK
SLAB RACK	Length: 3000mm, Rail Top: Wood
BUNDLE RACK 2W	Construction: Rubber Wheel Steel Rail, Slab supports: 2x6x100mm
BUNDLE RACK 3W	Construction: 2x6x100mm, 2x4x100mm (slab)

2. Choose post thickness: 4mm 5mm

3. Enter slab dimension & quantity

This tool will help you decide how many posts and what type of posts you may require.

Warning: Do not use the Aardwolf Slab Rack Storage Calculator to calculate the storage capacity of competitors' posts as they may use posts with a different profile and steel of lower yield strength.

FINISHED GOODS RACK

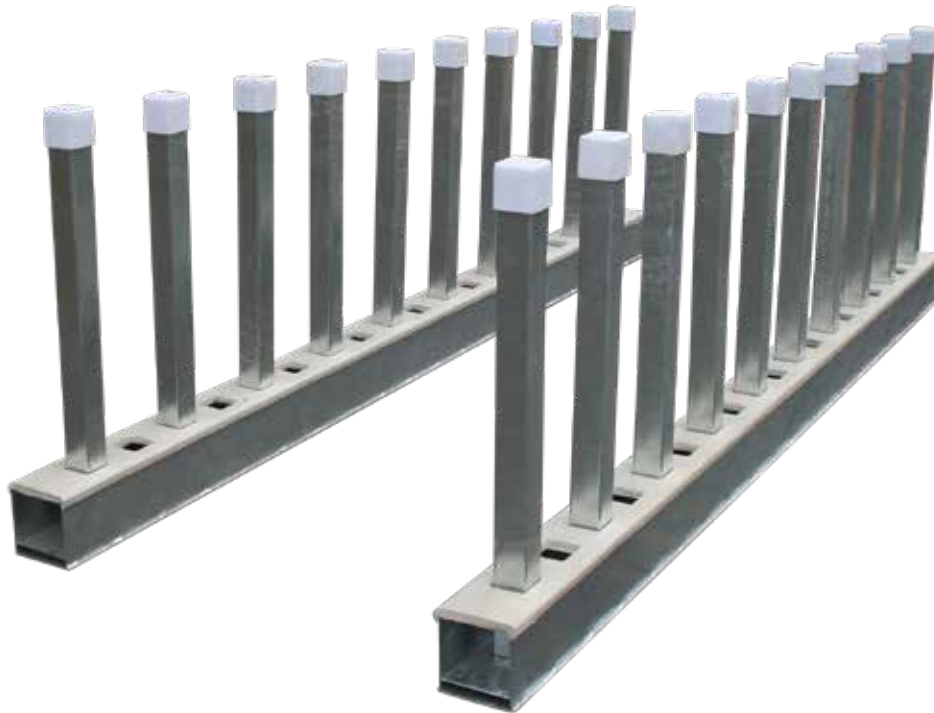

AFGR

Safely store products while taking up very little space. The Finished Goods Racks are for the storage of surplus stone pieces and finished items such as window sills, countertops, etc. Rails are topped with 10mm thick white rubber, making them particularly suitable for sensitive marble and granite slabs, preventing breakage and accidents.

- Posts can be removed to easily unload products.
- Easily lift slabs by means of the Aardwolf Lifter

Rail length	2400 mm
Post	50 x 50 x 700 mm
Net weight of the base	24 kg / PCS
Net weight of the post	6 kg / PCS
Gross weight of the base	24 kg

Note: Sold as a set, which includes 2 rubber-topped rails and 20 posts with rubber caps.

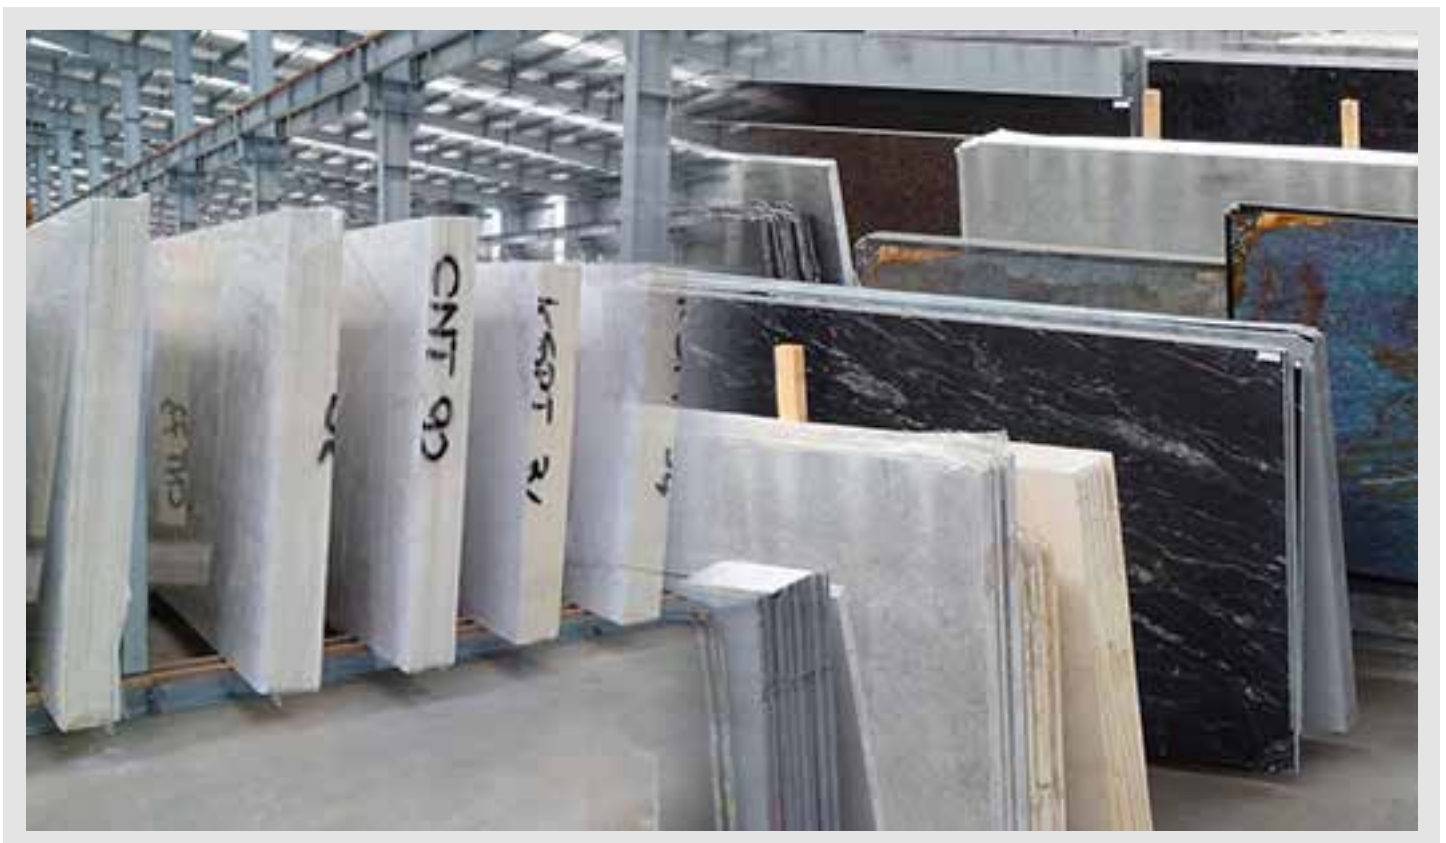

AARDWOLF REMNANT RACK

ARRO1

The Aardwolf Remnant Rack is designed specifically for storing off-cut pieces and remnants of all kinds. This rack is a strong structure to protect the material from damages, scratches, and chipping-off. The Aardwolf Remnant Rack is an economical and useful solution for storing granite, marble, engineered stones, etc in small spaces. It consists of 2 base rails 118" (3m) long with 15 open holes per side for the poles, 30" (740 mm) high.

The Aardwolf Remnant Rack is hot-dipped galvanized for protection against rust, which ensures a long service life.

Working load limit	1000 kg
Net weight	83.8 kg
Gross weight	84 kg
Packaging dimension	3000 x 205 x 150 mm

POSTS & OTHERS

STEEL POST BASE 1200-1400 **SPB1214**

- For accurately setting a 4° slab lean.
- Designed for slab and bundle rack posts with a height of 1200 or 1400mm

Height of post	1200 - 1400 mm
----------------	----------------

Net weight	1 kg
------------	------

STEEL POST BASE 1600-1800 **SPB1618**

- For accurately setting a 4° slab lean.
- Designed for slab and bundle rack posts with a height of 1600 or 1800mm.

Height of post	1600 - 1800 mm
----------------	----------------

Net weight	1 kg
------------	------

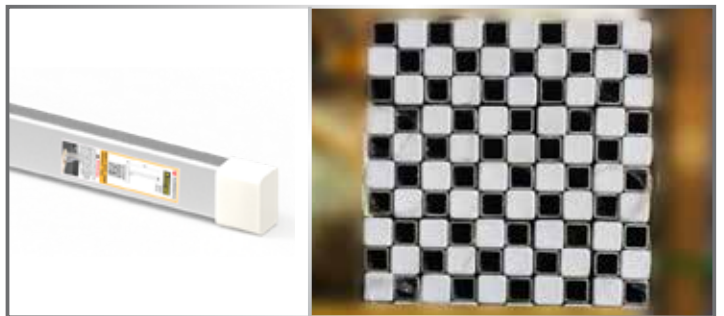

RUBBER CAP **ARC5050**

- Slab rack post accessory.
- The rubber cap protects stored marble and granite.
- Sold in boxes of 10 pcs.

Size	50 x 50 mm
------	------------

Net weight	0.08 kg
------------	---------

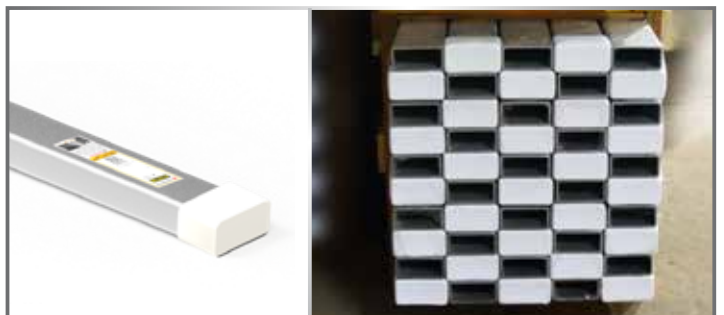

RUBBER CAP **ARC10050**

- Bundle rack post accessory.
- The rubber cap protects stored marble and granite.
- Sold in boxes of 10 pcs.

Size	100 x 50 mm
------	-------------

Net weight	0.14 kg
------------	---------
