VERSA BLOCK CLAMPS

AVBC-600

AVBC-1100

The Versa Block Clamps are made for lifting and moving concrete blocks, stone and other masonry materials. The clamp jaws can be adjusted to the desired widths quickly and simply by flicking a locking latch on side of the jaw and sliding the jaw to the required position. The Versa Block lifter is a multipurpose solution and can be fitted with different jaws to grab different material types, whether square or curved shapes. The jaws can be reversed to allow for picking up of objects from the inside face.

PIPE LIFTERS

Fast, efficient, flexible, smart and fully automatic, the Aardwolf mechanical lifters are designed to safely lift concrete pipes. The lifter does not require additional hydraulics. The operator is able to use the pipe lifter to grab, lift and move pipes without assistance. The narrow profile allows for the easy installation of concrete pipes into tight trenches.

BRICK GRABS LIFTERS

The Brick Grabs Lifter is made to move and place various bricks size without the electrical for it to operate. Clamping jaws are equipped with durable rubber to hold tight materials. This device can be used with different types of cranes such as overhead cranes, mobile cranes, truck-mounted cranes or forklifts… in the factory or on construction site. The load does not have to be palletized and can be handled from inconvenient positions with limited space. The grab has adjustable plunge depth – convenient when you handle loads of varying heights.

AARDWOLF
LIFTING CLAMPS EQUIPMENT

2020

Aardwolf lifting clamps are ideal for lifting and setting slab, sheets, pipes, concrete, stone, marble building fascia and other items. They are safe for hoisting, transferring, and positioning of loads in general material handling operations. Aardwolf lifting clamps works with many different types of hoisting equipment.

The jaws of the lifters are lined with vulcanized rubber to ensure a safe, secure and non-marking grip. The clamp jaws are gravity controlled. The jaws automatically closed when placed on a load and raised. They open and release the load when the load is set down.
