

# AARDWOLF KITCHEN INSTALLATION CART AKIC

October, 2022

+84 931 707 793

www.aardwolf.com.au info@aardwolf.com.au

The Aardwolf Kitchen Installation Cart provides a safer means of stone transportation and installation. The frame features a series of transfer bearings allowing the countertop to roll into place without friction and strain while increasing productivity and efficiency.

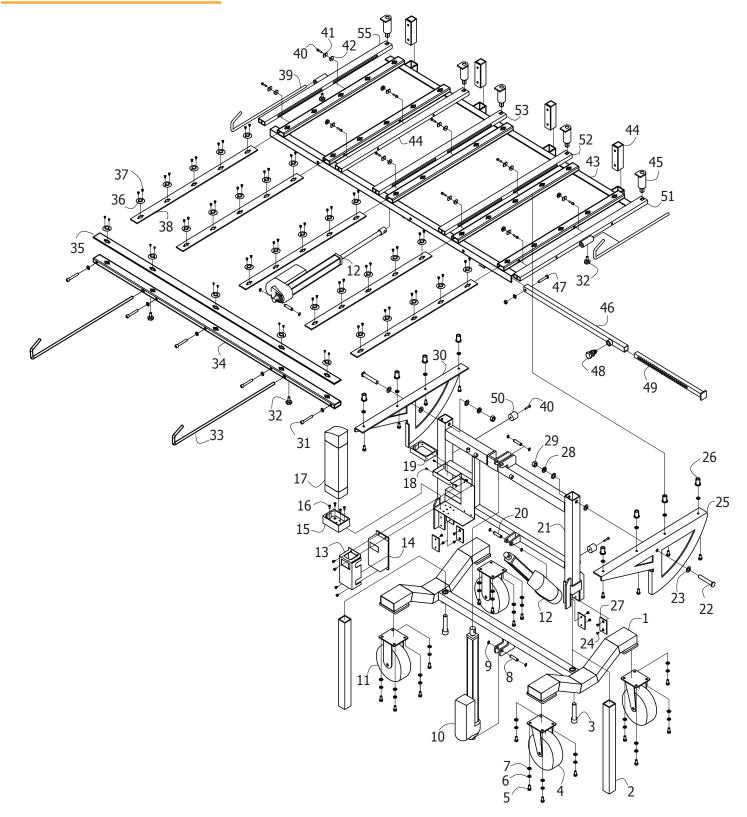

The cart accommodates any size countertop up to 500 kg (1102 lb). The cart can be used to lower, lift, and roll huge pieces onto the kitchen cabinet & assist with final countertop placement. The power lift feature elevates stone up to 13.8"- 40.7" from the ground to support rail and enables controlled tilting for more manageable, less hazardous installation.

The cart features a strong aluminum frame yet only weighs 147 kg (324 lb) for convenient transport and storage. The Aardwolf Kitchen Installation Cart is powered by a long-lasting rechargeable battery controlled via a wireless remote.

# SAFETY INSTRUCTIONS

- Carefully consider all safety regulations, standards, and codes in your country for hoisting operations.
- Ensure that each employee reads and understands this manual before using this cart.
- Please be cautious and alert at all times using this device for your and your fellow installer's safety. Be mindful that people are getting injured by handling heavy pieces of stone mostly due to lack of knowledge, carelessness, and not being focused on the task.
- Inspect the Kitchen Installation Cart. If the cart is worn or damaged, do not use it.
- Straps off Hands-on. When the table is in a horizontal position and without any straps holding the stone down on the cart, the stone could slide in any direction on the transfer bearings. Therefore, ensure someone has a hand on the stone when the straps are removed.
- Ensure brakes are on when the cart is not in motion.
- Do not exceed manufacturers capacity.
- Wear safety equipment, like a helmet, gloves, and safety boots

### **SPECIFICATIONS**

AKIC	Metric	Imperial
Dimensions of the table	2000 - 1100 mm	78.7 - 43.3 in
Height of the frame from the ground to support rail	350 - 1035 mm	13.8 - 40.7 in
Working load limit	500 kg	1102 lb
Net weight	147 kg	324 lb
Gross weight	194 kg	428 lb
Packaging dimensions	1920 x 1100 x 530 mm	75.6 x 43.3 x 20.9 in

## FEATURES

- Flexible table surface with fixed and adjustable surfaces for different material sizes.
- Equipped with transfer bearings on the table surface allows the countertop to be rolled into place without friction and strain.
- The cart can lower, lift, and roll huge workpieces and assist with final countertop placement.
- The product consists of 3 actuators for lowering, lifting and tilting workpieces.
- Wireless remote Control.
- It is engineered for optimum stability and maneuverability.
- It is powered by a 24V rechargeable lithium-ion battery.
- 10" non-marking, flat-free, shock-absorbing tires.

# **INSTRUCTIONS FOR USE**

- Check all parts of the Kitchen Installation Cart before working.
- Now you check the height and width of the frame, then check the length of the table.
- You can also check if the Electric Cylinder that supports the table's frame reaches maximum height by pressing the UP button on the Remote Control. Then check the frame in horizontal and vertical directions by pressing the TILTING DOWN and TILTIND UP buttons of the Remote Control. If they work well, you can start the job.
- First, turn on the Kitchen Installation Cart battery and keep your feet clear of the wheels.
- Observe the LCD on the battery; if it shows a full battery, you can work safely.
- Use the Aardwolf products as Self-locking Trolleys combined with the Stone Panel Carriers or Carry Clamp for Sheet Material to place the stone slab onto the Kitchen Installation Cart. You ensure that the slab must be placed on the rollers and then push the slab to be balanced on the frame.
- Attach the rods on the stone slab surface to ensure the material is tightened into the frame.
- Press the TILTING DOWN of the Remote Control to tilt the loaded frame down, and it can be flipped the stone slab rest on the frame. Ensure that the center of the stone slab lines up with the center of the Kitchen Installation Cart.
- Observe the loaded frame parallels the height and width of the kitchen countertop, and you
  can stop pressing the Remote Control and use your hands to slide the stone slab onto the
  kitchen countertop's surface to complete the work.

# **INSTRUCTIONS FOR USE**

**NOTE:** Suppose the distance from the slab position you take it into the Kitchen Installation Cart to the Kitchen Countertop is so far. In that case, you can use Remote Control to adjust the height of the frame, the length, and the width of the table so that you can move it quickly. And you can see "How to use the Remote Control" to clarify each feature below:

### HOW TO USE THE REMOTE CONTROL:

Remote Control is used to tilt/adjust the frame's height and width and the table's length.

- **UP:** Press and keep button to adjust the maximum height of the Kitchens Installation Cart.
- **DOWN:** Press and keep the button to adjust the minimum height of the Kitchens Installation Cart.
- **UP-DOWN** buttons are used to adjust the height of the Kitchen Installation Cart so that it is paralleled with the surface of the kitchen countertop.
- **THE TILTING DOWN** is used to flip "down" the loaded frame to the horizontal direction by pressing and keeping this button.
- THE TILTING UP is used to flip "up" the loaded frame to the vertical

direction by pressing and keeping this button.

• **EXTENDING - RETRACTING** buttons adjust the width of the table's frame. It means you can adjust the width of the table's frame to be widened or narrow, which is suitable for stone slab sizes.

# **INSPECTIONS, MAINTENANCE AND REPAIR**

- Before each use, check for damaged or missing components. Replace broken or missing pieces immediately with Aardwolf replacement parts.
- Check all fasteners, and make sure to tighten or replace loose or missing hardware.
- Check welds and material near welds for cracking or damage.
- · Grease jacks, wheels, and brakes regularly.
- Lubricate transfer roller bearings. Wipe down any excessive oil.
- Check kitchen installation cart clearance regularly. Allow just enough clearance for brackets to swivel by themselves when the table is tilted to a horizontal position.
- Keep the Aardwolf Kitchen Installation Cart clean.
- Store the Cart indoors for longevity.

### WARRANTY

At the time of delivery, it is necessary to check that the Kitchen Installation Cart has not been damaged during shipment.

Any claims must be presented within eight days of the product's delivery date. We grant you one year warranty on the Aardwolf Kitchen Installation Cart countered from the date of purchase.

The warranty coverage is not applicable if:

- The Kitchen Installation Cart is mishandled during manoeuvring.
- The operator fails to comply with the instructions in this booklet.
- The product's maximum permissible capacity is exceeded.
- The specifications for the cart are not followed.
- Damages are due to inadequate maintenance and inspections.
- Damage is due to improper storage.
- The user performed repairs without our permission.
- The user uses non-original spare parts from the Aardwolf brand.
